

→ general account settings and personal info
→ sharing and group management.

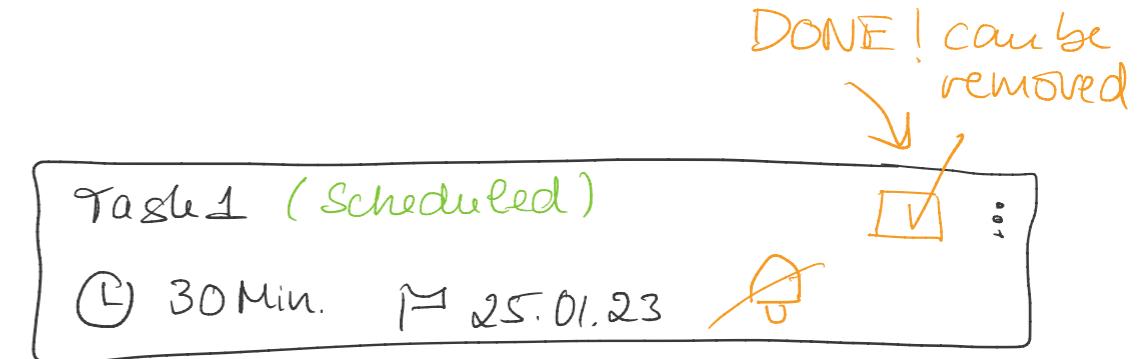

→ introduce further color schemes
(but consider color contrast & visibility)

→ sound settings for focus & break sessions.

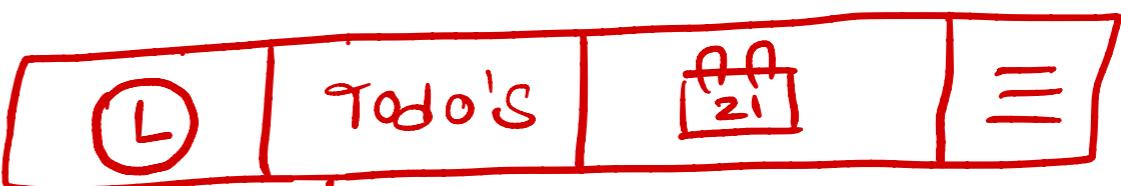

→ type of calendar (geman, canadian, ...),
maybe sync with existing calendars?
maybe also view settings for day, week, month, yr...

Statistics (Battery View)

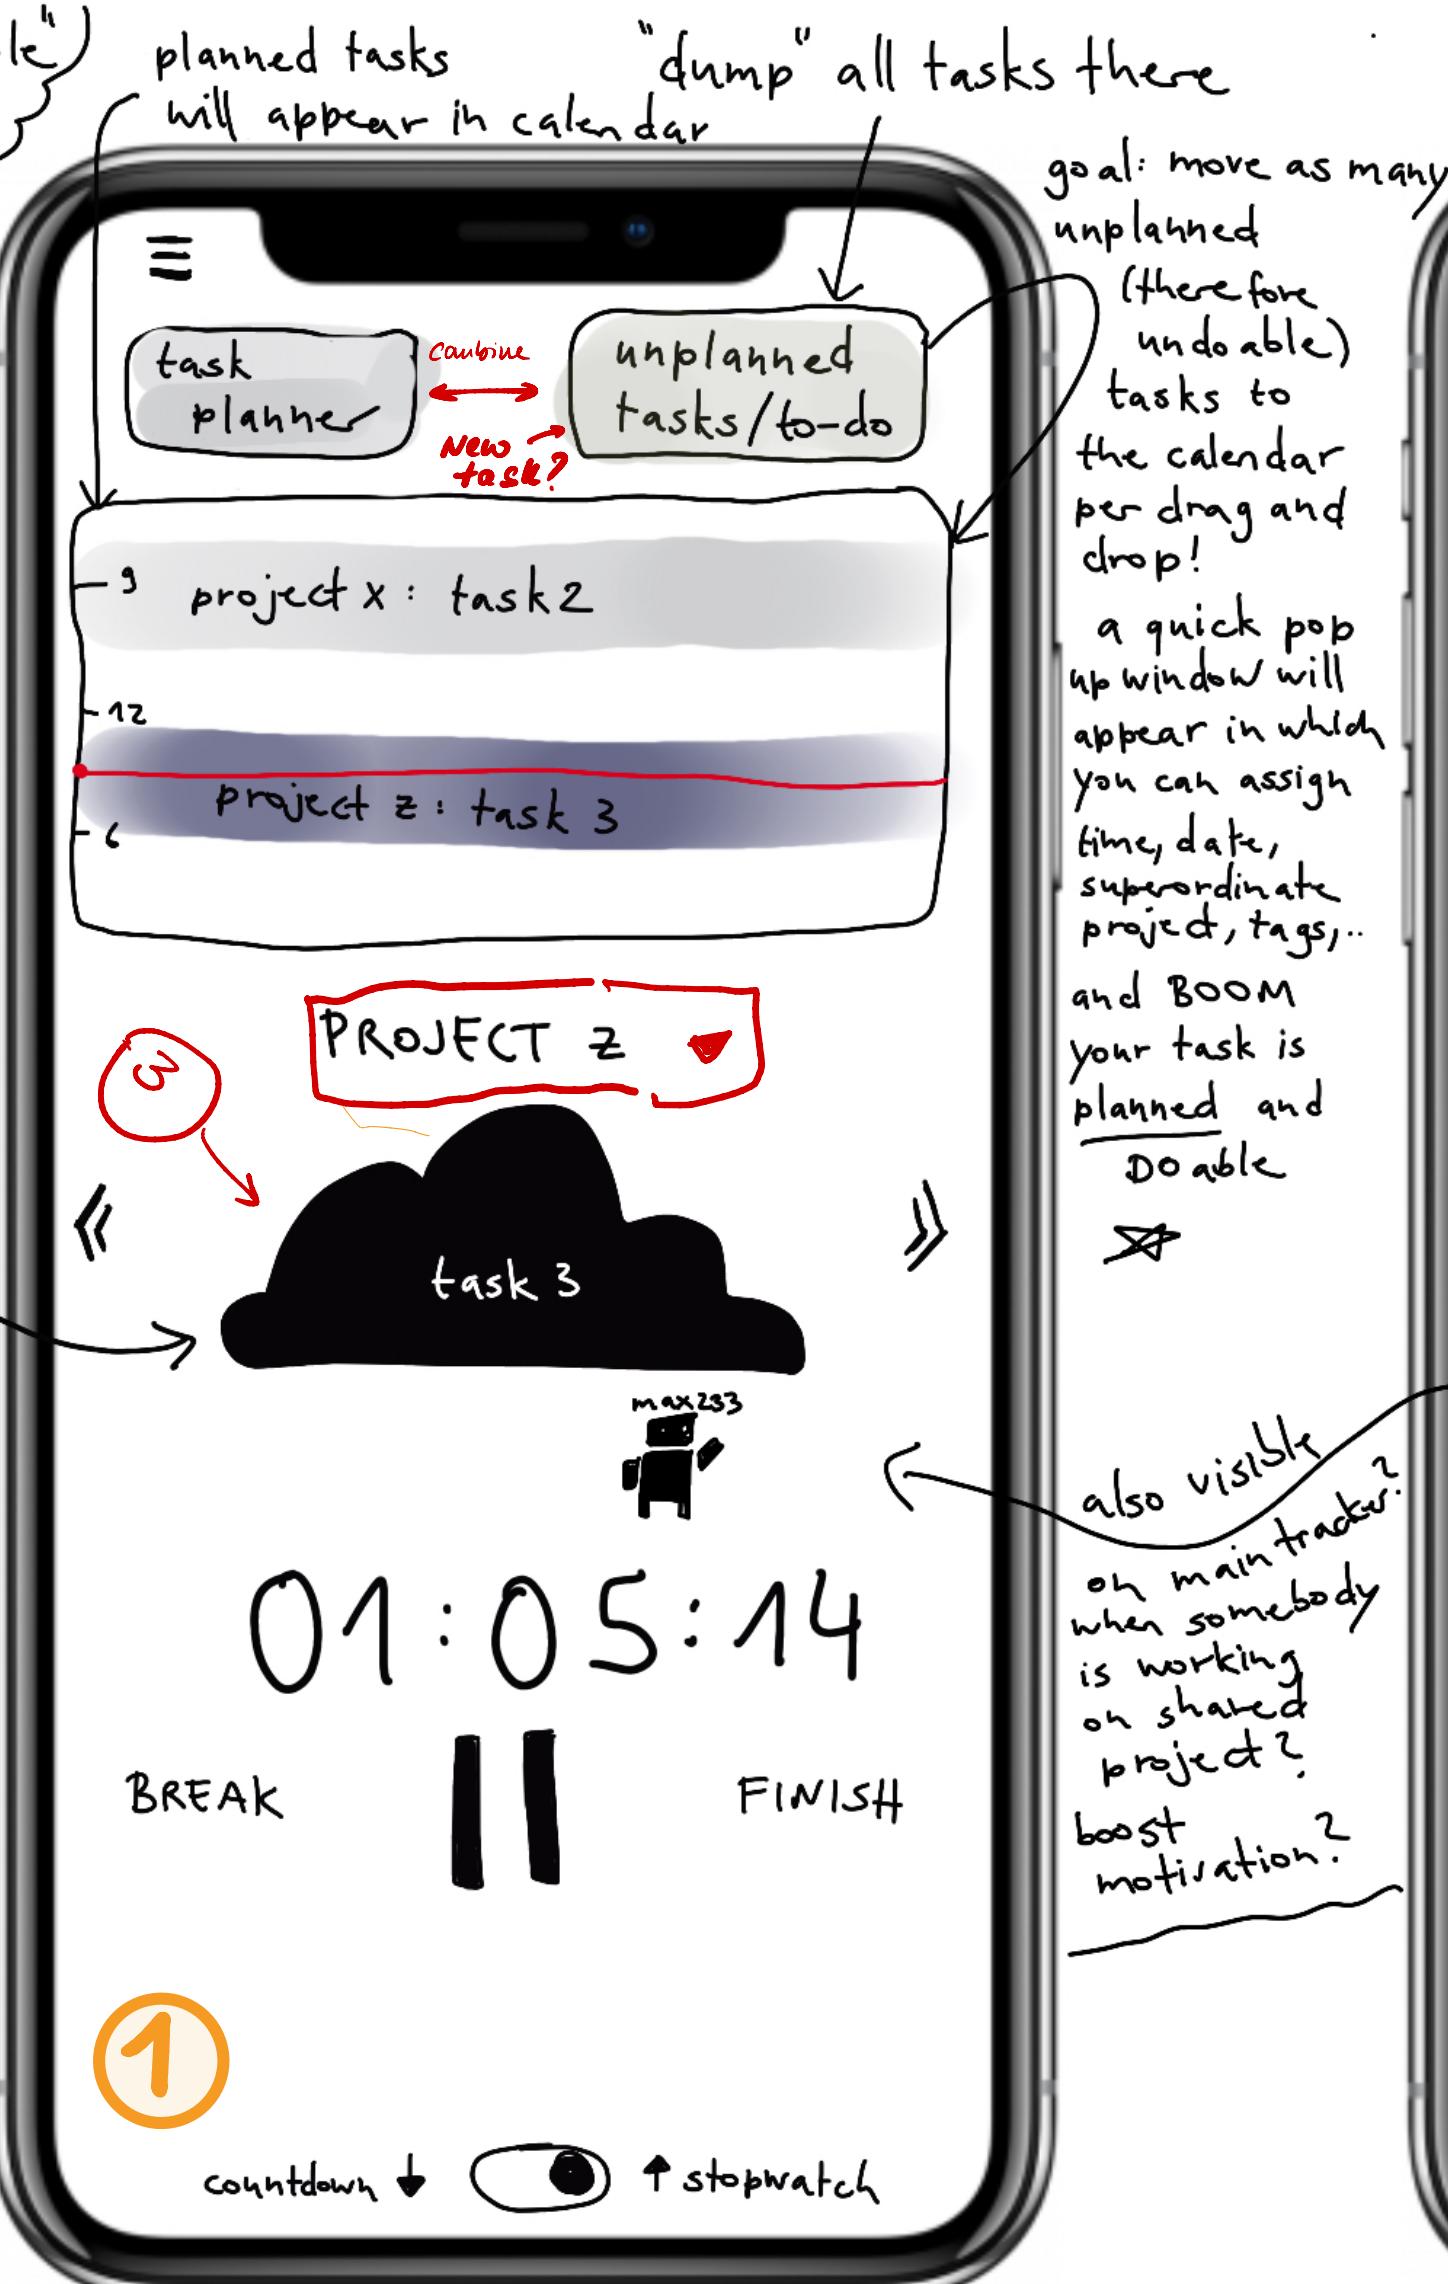

app name: "D
problem: everybody has those tasks that won't get done despite being on your to-do list those tasks fell victim to postponing, procrastination..
WHY?
you didn't give your task a time and place to live.
solution
-make them DOable!

- main tracker for task "sessions" →
- swipe to start timer on the right project
- click on the project to select a specific task e.g. note

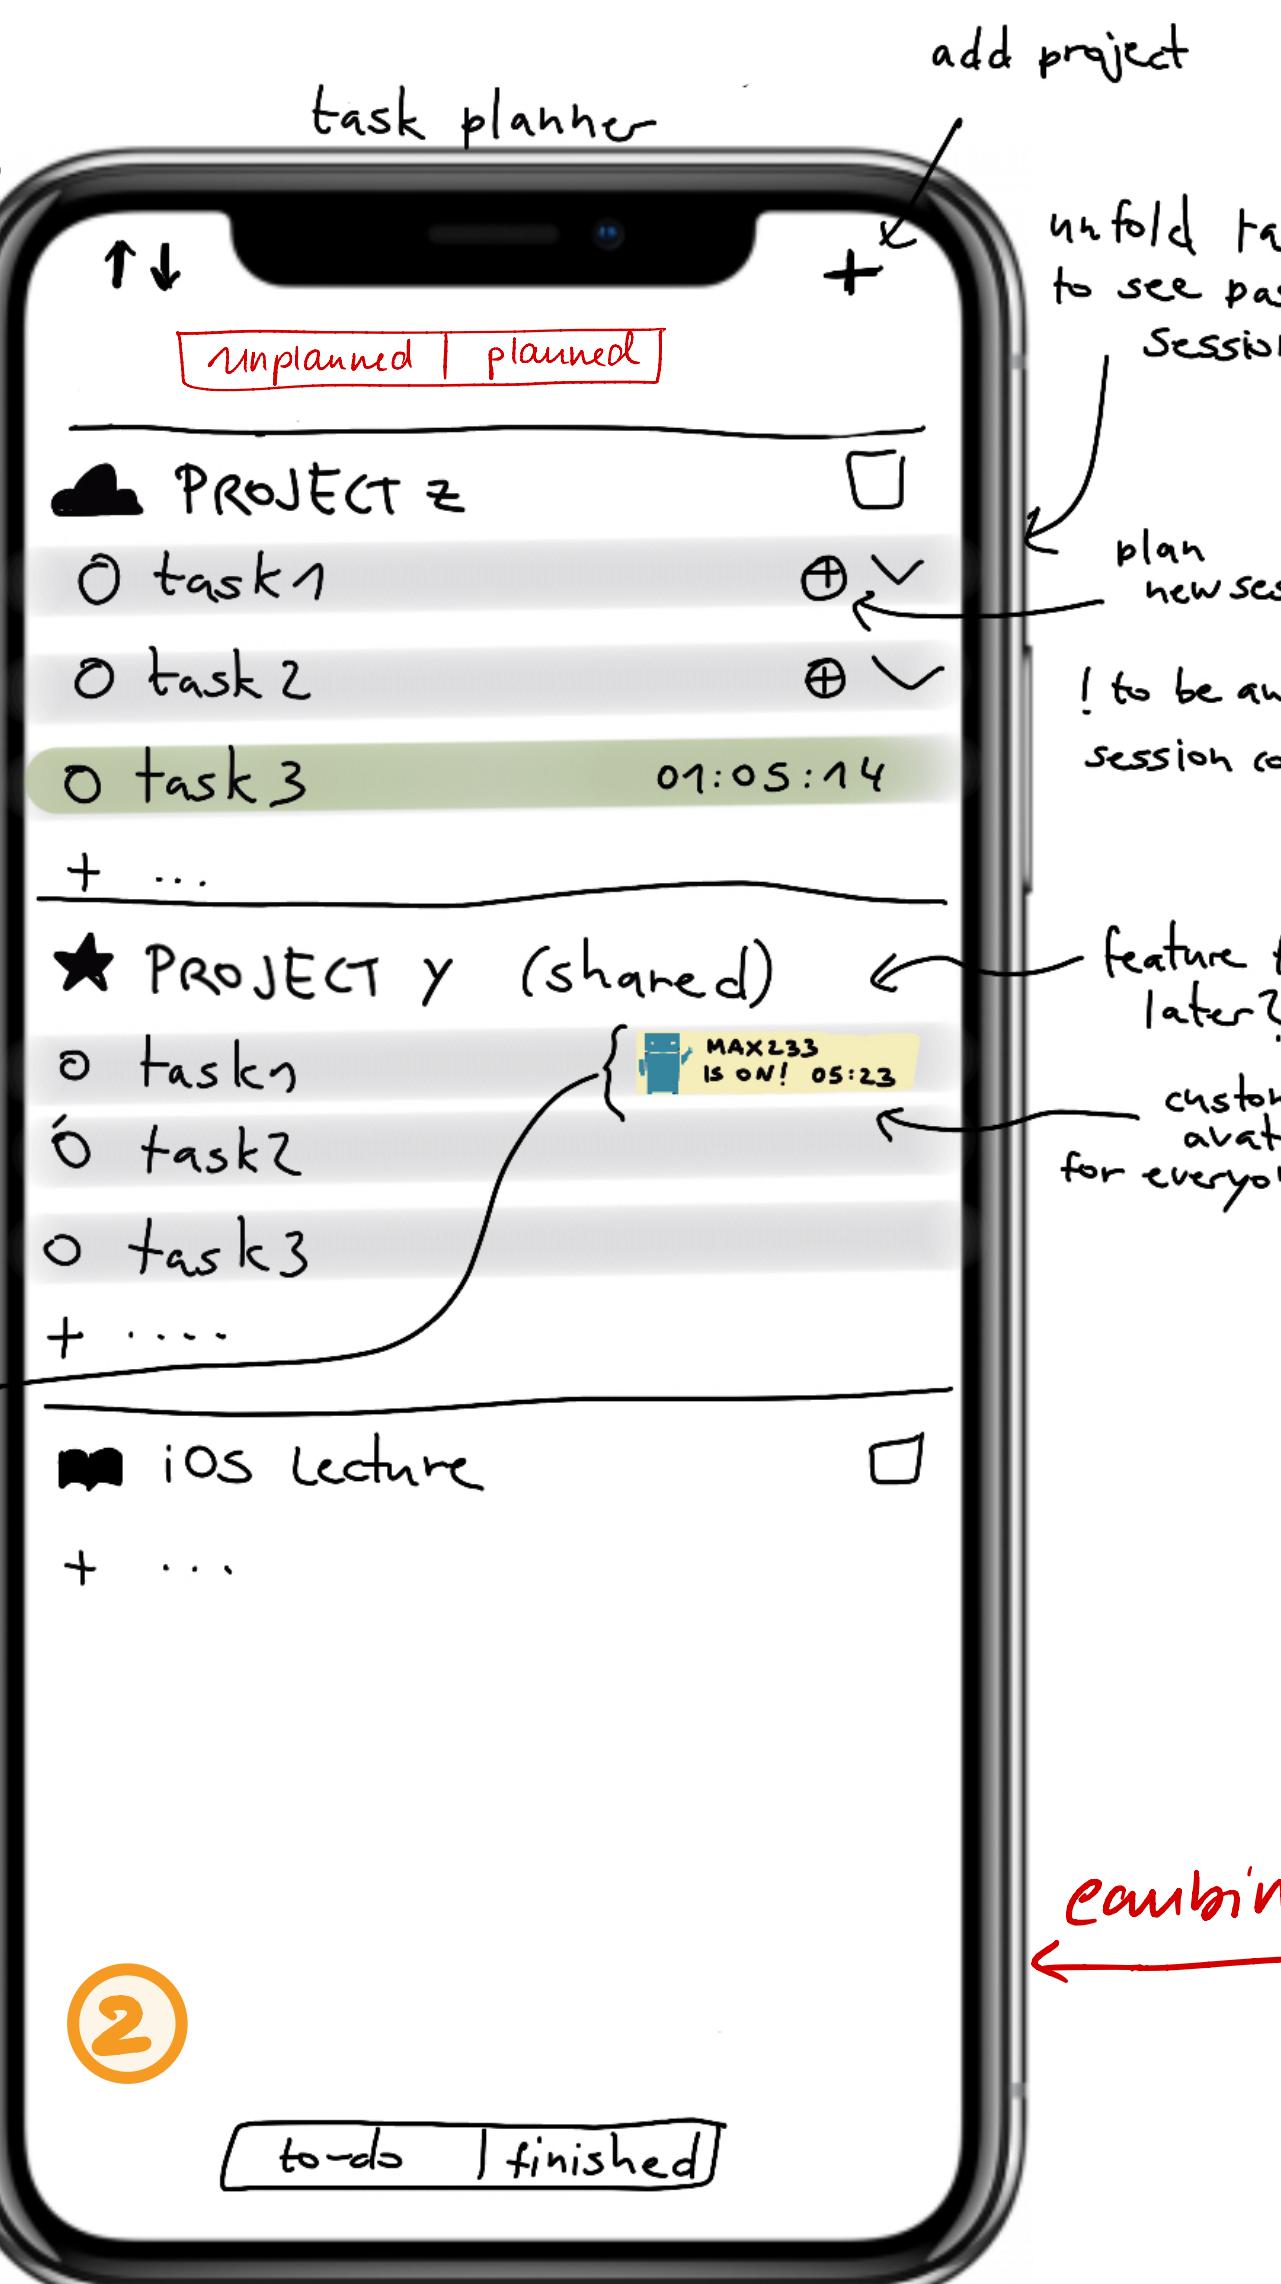

task1
task2
task3
task4
task5
